rspb giving nature a home

Sounds of Spring

Here's how you can recognise and remember the song of six bird species that are singing around you in spring and early summer. Go to the RSPB website to hear each song. Simply Google "RSPB" and the name of each bird.

1 Great tit

This bird sounds like it's at school, because it keeps singing "tea-cher, tea-cher".

2 Chiffchaff

It's tiny, but it's migrated all the way here from Africa. You'll hear it among trees and bushes singing a random mix of "chiff" and "chaff".

3 Robin

The robin in the garden can whistle higher than we can. Its whistling song rises at the end, as if it was asking a question.

4 Blackbird

The blackbird has the nearest song to what we would call a real tune. Some people say it sounds fluty. Listen for it at dawn and dusk.

5 Collared dove

Listen for the three-note call – "cu-coo-cu".

6 Woodpigeon

This call is a lot like that of the collared dove, but it always has five notes – "cu coo cu, cu-cu".
