How many of these birds can you find around where you live?

As you spot each bird, write down where you found it.

House sparrow

Search in hedges, parks and gardens for small, chirpy, streaky brown birds. Male has grey cap and black chin; female is plainer.

Where?

Starling

Bigger than a sparrow, but smaller than a blackbird (speckled in winter), short tail, pointed beak and waddling walk. Often in flocks.

Where?

Blue tit

Tiny green and yellow bird with blue wings and tail. Look for blue cap edged with white. Common in gardens and woods.

Where?

Blackbird

Common in gardens and woods, between sparrow and pigeon in size. Male black with yellow beak, female brown.

Where?

Woodpigeon

Common, big, grey pigeon with a white band on the wing and white neck patches. Wings make a noisy clatter. Often in flocks.

Where?

Robin

A small, perky garden and woodland bird. The orange-red face and chest are unique but not quite as bright as you might expect.

Where?

Great tit

Smaller than a sparrow but bright, bold and noisy. Has a black cap, big white cheek patches and black stripe down front.

Where?

Goldfinch

Brightly-coloured sparrow-sized, usually seen in flocks, giving ringing calls.
